

**The New York Schools Insurance Reciprocal
& NYS IPM Program - Cornell University present an exclusive free
seminar to NYSIR Subscribers**

Tick Awareness & Management on School Properties

Who Should Attend? This seminar is intended for the individuals responsible for the maintenance of school district grounds, pest control staff & decision makers. Please extend this invitation to Facilities Directors and members of the Facilities Department.

Topics to Be Covered:

- Presentation by NYSIPM Specialists on tick species, ecology, disease potential & management strategies.

The NY State IPM Program has a long history of cooperation with K-12 schools to promote the adoption of integrated pest management & best practices for indoor & outdoor pests. Ticks are of increasing concern for New Yorkers & disease incidence is on the rise. To keep school children safe while attending school, grounds departments need to understand and effectively manage ticks & exposure to ticks. This workshop is offered by Extension Specialists of the NYSIPM Program. Participants will leave this seminar with knowledge and resources to be used in their districts/BOCES.

**Speakers: Jody Gangloff-Kaufmann, PhD, Coordinator
Joellen Lampman, Extension Educator
Community IPM Program/NYS IPM Program**
